MANAGEMENT

Daewon Engineering has designed and manufactured and supplied HVAC system and Heating equipment to the industrial market since 1983.

We are a technology leader in design and manufacture of heating equipment, outfitting equipment, process heater, control panel, refrigeration equipment and other HVAC equipment. We have globalized world network system for customer's satisfaction. Daewon Engineering is a good partner of HVAC system and Heating equipment for marine & offshore, petrochemical, nuclear and thermal power plant, refrigeration and agriculture storage system and other industrial division.

We provide economical solutions for our customer with technical support. We take pride in our best quality, economical engineering and workmanship with customer satisfaction at the business. Our all member do their best to valuable customer satisfaction.

Sim Sang Chil

HISTORY & CERTIFICATION

1980s

- 1983.07** Established DAEWON Engineering corporation company
- 1988.03** Acquired Korea Science Apparatus Industry Cooperative

1990s

- 1990.03** Acquired the Head office building & 1st factory (Yeonje-gu, Busan)
- 1991.06** Acquired Busan Machine Industry Cooperative
- 1993.03** Got permission to do heating equipment appliance manufacture business by government
- 1993.11** KORI Nuclear Power plant, heating equipment manufactured
- 1994.08** Registered cooperate with HANJIN Heavy Industry for HVAC system & Heating equipment supplier
- 1994.11** Registered cooperate with HYUNDAI Heavy Industry for HVAC system & Heating equipment supplier
- 1995.01** Registered cooperate with DAEWOO Heavy Industry for HVAC system & Heating equipment supplier
- 1996.03** Registered cooperate with SAMSUNG Heavy Industry for HVAC system & Heating equipment supplier
- 1998.10** Enclosure IP67 grade type heating equipment developed and approved by official institution

2000s

- 2001.05** Explosion proof type heating equipment (Ex d IIC T3) developed and certified by KIMM institution
- 2003.05** Manufacture and Servicing of HVAC system & Heater ISO 9001 : 2000 Approved by ORION, USA organization
- 2005.07** Acquired the 2nd factory (Miryang, Gyeongnam)
- 2009.02** Acquired Innovation company & Venture company approved by government

2010s

CERTIFICATION

- 2010.11** Recognize good export trade company by government
- 2012.05** KTX(Korea Train Express), heating equipment manufactured
- 2015.10** Acquired the 3rd, 4th factory (Yangsan, Gyeongnam / Noksan, Busan)
- 2016.07** Acquired the 5th factory (Pohang, Gyeongbuk)
- 2016.12** Explosion proof type heating equipment certified by IECEx / ATEX
- 2017.10** Registered cooperate with DOOSAN Heavy Industry for HVAC system & Heating equipment supplier
- 2018.02** ISO 9001:2015, ISO 14001:2015 approved by KECR
- 2018.06** Certified KARISO ATEC supplier
- 2018.12** Selected as a member company of SME Innovation Center
- 2019.01** Selected as a leading company of strategic industry in Busan
- 2019.03** Certified as Inno-Biz by Technology Innovative Small Business (Inno-Biz)
- 2019.04** Selected as Busan Type Hidden Champion Company
- 2019.05** Awarded the prize of Ministry of Commerce, Industry and Energy
- 2019.06** Establishment of affiliated research institute

ABOUT US

FIELD OF BUSINESS

Shipbuilding & Offshore Division

LNG carriers, Tankers, Container ships, Ro-Ro ships, Ferries, Bulk carriers, Naval & Specialty ships, Drilling Rigs, Drillships, FPSO, FSRU, Fixed platforms, Arctic vessel

Onshore Plant Division

Petrochemical plant, Nuclear power plant, Thermal power plant, Oil refining system, Floating power plant, Aerospace Industry

General Machinery Division

Refrigeration facility, Railway industry, Steel pre-treatment, Agricultural products storage, Smart farm facility, Military equipment, Commercial and industrial building

HEATING EQUIPMENT

ELECTRIC HEATER

Electric heaters are used to control the space air temperature. There are radiator and fan type depending on the heating capacity. The enclosure grade is designed and manufactured according to the environment condition.

Radiator Type

COMPONENTS	SPEC.
Model	AS Series
Capacity	0.3kW ~ 3.0kW
Rated Voltage	110V ~ 230V
Installation	Wall Mounting

Fan Type

COMPONENTS	SPEC.
Model	FS Series
Capacity	5.0kW ~ 50.0kW
Rated Voltage	110V ~ 690V
Installation	Wall or Deck Mounting

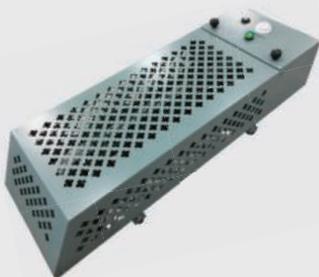

COMPONENTS	SPEC.
Model	CS Series
Capacity	0.3kW ~ 3.0kW
Rated Voltage	110V ~ 230V
Installation	Wall Mounting

Duct Type

COMPONENTS	SPEC.
Model	DS Series
Capacity	Various
Rated Voltage	110V ~ 690V
Installation	Duct Mounting

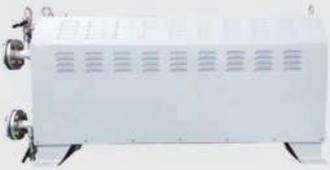

COMPONENTS	SPEC.
Model	BS Series
Capacity	1.5kW ~ 5.0kW
Rated Voltage	110V ~ 690V
Installation	Wall Mounting

STEAM & THERMAL OIL & HOT WATER HEATER

These heaters are used as a fluid source (Steam, Thermal Oil, Hot Water) to control air temperature.

Radiator Type

COMPONENTS	SPEC.
Model	RS-(S,T,W) Series
Capacity	1.0kW ~ 15.0kW
Rated Voltage	n/a
Installation	Wall or Deck Mounting

Fan Type

COMPONENTS	SPEC.
Model	FS-(S,T,W) Series
Capacity	5.0kW ~ 90.0kW
Rated Voltage	110V ~ 690V
Installation	Wall or Deck Mounting

Duct Type

COMPONENTS	SPEC.
Model	DS-(S,T,W) Series
Capacity	Various
Rated Voltage	n/a
Installation	Duct Mounting

EXPLOSION PROOF HEATER

Explosion proof heaters used for heating in hazardous areas. This equipment is certified. (IECEX, ATEX, KIMM)

Radiator Type

COMPONENTS	SPEC.
Model	ERB Series
Capacity	0.5kW / 1.0kW / 1.5kW / 2.0kW
Rated Voltage	110V ~ 230V
Installation	Wall or Deck Mounting
Protection Mode	Ex db IIC T3 / T4
IP Grade	IP66

Fan Type

COMPONENTS	SPEC.
Model	EFS Series
Capacity	5kW ~ 35kW
Rated Voltage	220V ~ 690V
Installation	Wall or Deck Mounting
Protection Mode	Ex de IIB / IIC T1 ~ T6
IP Grade	IP66

Duct Type

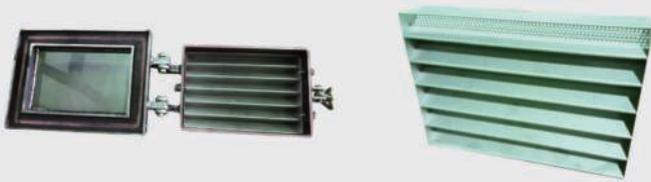

COMPONENTS	SPEC.
Model	EDH Series
Capacity	Various
Rated Voltage	110V ~ 690V
Installation	Duct Mounting
Protection Mode	Exe IIC T1 ~ T6
IP Grade	IP66

OUTFITTING EQUIPMENT

LOUVER VENTILATOR

Louvers are used to remove water and dust or debris from the outside air intake. According to specification can decide application of cover.

Lamella Perforated Type

COMPONENTS	SPEC.
Size(mm)	300x200 ~ 1200x1500
Door Opening	Left / Right
Installation	Welding

Normal Blade Type

COMPONENTS	SPEC.
Size(mm)	300x200 ~ 700x500
Door Opening	Left / Right
Installation	Flange Mounting

Downward Type

COMPONENTS	SPEC.
Size(mm)	300x200 ~ 900x500
Door Opening	Left / Right
Installation	Welding

Water Catcher Type (Moisture / Mist Eliminator)

COMPONENTS	SPEC.
Size(mm)	500x500 ~ 1200x1800
Door Opening	Left / Right
Installation	Flange Mounting

Anti-Icing Louvers are used in arctic vessel and plant installations. It is a equipment that prevents the cold air from freezing to block the flow.

Electric Anti-Icing Louver

Thermal Oil Anti-Icing Louver

DAMPER

Dampers are used to control air quantity in the room for room temperature.

Volume Control Damper

Pressure Relief / Non Return Damper

Fire Damper

SILENCER

Silencers are used to prevent noise generated by exhaust gases, internal combustion engines, blowers and compressors.

Air-Con Package Silencer

Duct Silencer

Sound Attenuator (Baffle Silencer)

EGP Silencer

PRESSURE RELIEF VALVE & GRILL WITH SHUTTER

Pressure relief valves regulated the air pressure and flow beyond the pressure values initially set on the duct or pipe lines. Grill is a device to control the airflow.

Pressure Relief Valve

Grill with Shutter

PROCESS EQUIPMENT

IMMERSION HEATER

Immersion heaters are installed in a tank or pressure vessel and used to heat internal fluids.

COMPONENTS	SPEC.
Model	IS series
Capacity	Various
Rated Voltage	110V ~ 690V
Installation	Flange Mounting

PRESSURE VESSEL

Pressure vessel designed and manufactured according to various temperature and pressure condition.

COMPONENTS	SPEC.
Model	ISV Series
Capacity	Various
Design Pressure	5 Bar ~ 30 Bar
Installation	Flange Mounting
Apply Fluid	Oil, Water, Air, Gas, etc.

CONTROL EQUIPMENT

CONTROL PANEL

Panels are control and operating check about electric equipment & system. (safety type or explosion proof type)

EXPLOSION PROOF THERMOSTAT

Explosion proof type thermostat used for air temperature sensing in hazardous areas. This equipment is certified. (IECEX, ATEX, KIMM)

COMPONENTS	SPEC.
Model	ERT series
Installation	Wall Mounting
Protection Mode	Ex db IIC T6
IP Grade	IP66

Unit Cooler / Evaporator-Condenser (Eva-Con)

REFRIGERATION EQUIPMENT

UNIT COOLER

Supply and installation of unit cooler equipment for refrigeration facilities.

COMPONENTS	SPEC.
Model	Unit Cooler
Gas	Ammonia / Freon
Installation	<ul style="list-style-type: none">- Ceiling Mounting- Ceiling & Floor Mounting- Upper Mounting- Front Suction Type

EVAPORATOR - CONDENSER (EVA-CON)

Supply and installation of Eva-Con equipment for refrigeration facilities.

COMPONENTS	SPEC.
Model	Eva Con
Capacity	40RT ~ 300RT
Installation	<ul style="list-style-type: none">- Ceiling Mounting- Ceiling & Floor Mounting- Upper Mounting- Front Suction Type

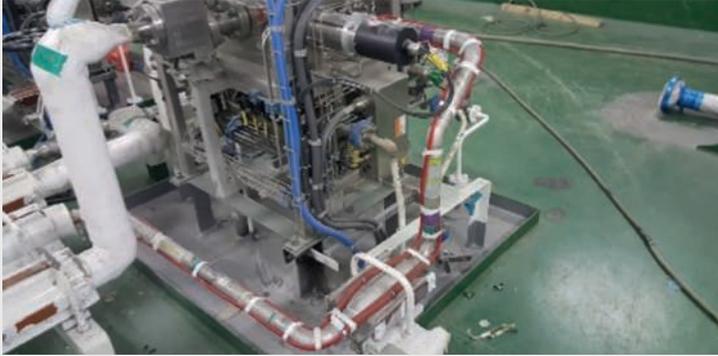

Pipe Trace Heating / Surface Trace Heating

ELECTRIC HEAT TRACING

PIPE TRACE HEATING

Application of piping trace heating is anti-freezing and temperature-maintenance.

SURFACE TRACE HEATING

Surface trace heating cables are applied to prevent freezing of slopes, stairs, roofs, floors and air intake of plants or vessels.

Laser Cutting and Bending / Steel Pre-Treatment

STEEL FABRICATION

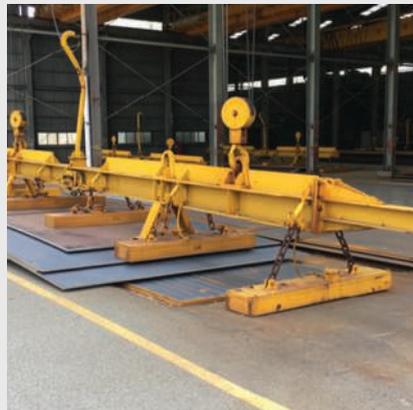

LASER CUTTING AND BENDING

It is a fabrication process the designed shape by laser cutting and bending.

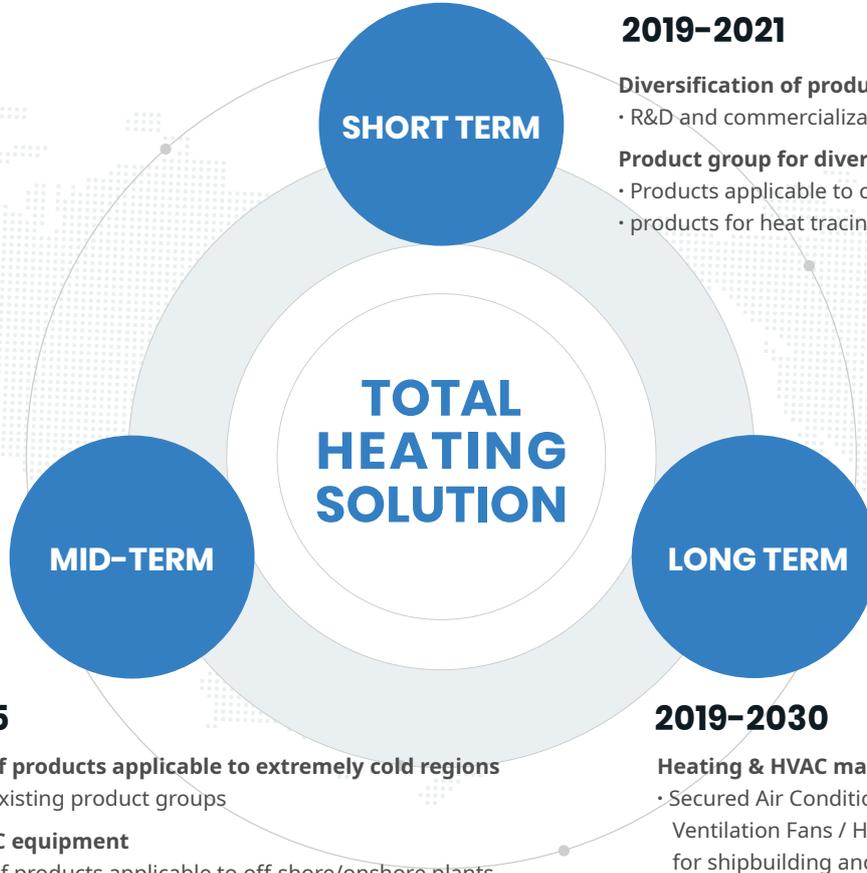

STEEL PRE-TREATMENT

It is a process to handle the surface of steel to prevent corrosion.
Remove the rust and debris of steel plate and apply pre-treatment process. (zinc primer painting)

VISION

DAEWON ENGINEERING

2019-2021

Diversification of products (customers)
 · R&D and commercialization

Product group for diversification

- Products applicable to onshore plants
- products for heat tracing, Scrubber, Silencer etc.

2019-2025

Development of products applicable to extremely cold regions

- Upgrading of existing product groups

Heating & HVAC equipment

- Development of products applicable to off-shore/onshore plants
- Supplying to onshore plants of Doosan Heavy Industries and three major shipbuilding companies

2019-2030

Heating & HVAC marketing and technical support

- Secured Air Conditioning System / Ventilation Fans / HVAC System products for shipbuilding and onshore plants

FUTURE PLANNING

NEW BIZ

- Development and commercialization of onshore heating tracing systems
- Development of low frequency noise-reducing hybrid EGP silencer
- Core Product R&D for heavy industries
- Competitiveness-boosting tech and explosion-proof products research

VALUE UP R&D

- R&D to improve the process/ quality of ARCTIC Ice Class – Air Heater Unit (Thermal Oil / Heating Cable)
- Development of own brand for Louver Damper / Acoustic Louver for onshore plants

NEW BIZ R&D

- Development of items for polar environments
- Development of a high value-added system related to Air Heater/HVAC
- Development of items for future industries: Heating Tracing Sys. / EGP Silencer
- Development of a home-grown military supply equipment : Intake Filtration System
- Vessel and offshore project engineering and optimization

R&D PLANNING

- Securing capabilities for in-house planning and development through strengthened capabilities of R&D personnel
- Secured the basis for R&D and independent technology development through winning government-sponsored projects
- Established infrastructure for institutions such as government-funded research institutes/ universities

R&D CENTER

ABOUT R&D CENTER

Daewon Engineering's R&D Center continues its technological innovation based on creativity and agility to contribute to the company's growth as an innovative company.

Through collaboration with prestigious research institutes at home and abroad, constant efforts are made to strengthen capabilities for independently producing parts and equipment needed in off-shore shipbuilding plants and onshore plants.

Drawing on the innovation achieved through such efforts, collaboration with partner institutions and improved technological competitiveness will help the R&D Center in becoming one that presents a vision for the future.

HISTORY

The Technology R&D Center of Daewon Engineering is committed to creating new businesses through ongoing R&D, to contribute to realizing a future vision for Daewon Engineering.

2017

Development of an explosion-proof temperature moderating device for heaters

Development of a winterization chamber for the evaluation of the function of heaters

2018

Establishment of R&D department

Membership of Small and Medium Business Technology Innovation Center

Selected as an export promising small business by Government

2019

Selected as a leading company of strategic industry in Busan

Selected as a new export company

Selected as a global IP star company

Selected as a project to upgrade the precision intelligent machine parts convergence technology

Selected as Busan-Type Hidden Champion Company

Selected as a participant in the New Business R&D Voucher Project (Ministry of Small & Medium-Sized Enterprises)

Selected as a participant in Korean pavilion of the Saint Petersburg Exposition (KOTRA)

Certified as Inno-Biz by Technology Innovative Small Business (Inno-Biz)

Selected as a participant in the Project to Provide Export Vouchers (Ministry of Small and Medium-sized Enterprises)

Established an affiliated research center of Daewon Engineering (KOITA)

Development of a heating tracing system to prevent freezing in onshore/offshore plants

Awarded the Minister's Prize by the Busan Department of Industrial Support for Outstanding Inventors (Ministry of Trade and Commerce)

Selected as a recipient of tailored support for leading companies in tuning parts (Evaluation Board for the Jeonnam region)

Selected as a participant in the Support Project for Hidden Champion Corporations (Busan PT)

2020

Implemented a project to develop patented videos / patent maps / designs (radiator) (KOTRA)

Developed a website, catalogue and corporate promotional video in English and Russian (Ministry of Small and Medium-sized Enterprises)

Selected as a participant in Korean pavilion of the Saint Petersburg Exposition (KOTRA)

Established the research center, TEST-BED LAB (in-house)

Selected as a participant in the 2019 Project to Provide vouchers for Innovative Growth

Certified as a company specializing in materials and parts

Participated in a consortium to establish a cluster for the domestic production of equipment for oil and gas plants

RESEARCH ACHIEVEMENT

NO	DETAILS OF THE DEVELOPMENT
01	Domestic development of explosion-proof electric heaters for marine structures
02	In-house development of a Winterization Chamber to evaluate the function of heaters
03	In-house development of an explosion-proof temperature moderating device for heaters
04	Development of 500kW Explosion Proof Type Air Heater Unit (ARC7 ICE CLASS)
05	Development of pre-heater with an ICT function ANTI-ICING LOUVER and HEATING CABLE applied
06	Development of core facilities for HVAC with ICT function applied for extremely cold regions
07	Development of acoustic louver for shipbuilding/offshore plant HVAC
08	Development of hybrid E.G.P. silencer to reduce low frequency noise
09	Development of heater designs for ship cabins

CERTIFICATIONS

NO	CERTIFICATION DETAILS	NO	CERTIFICATION DETAILS
01	International specification certifications (e.g. RMRS, ATEX)	04	Leading company in Busan
02	Export voucher company	05	Hidden Champion company in Busan
03	Global IP star company	06	Company specializing in parts/materials

RESEARCH PERFORMANCE

Air Heater Unit applied with Arc7 Ice Class (-50°C) for Arctic environment
 - Explosion proof type (with ATEX certification)

Combination Type E.G.P Silencer (with Spark Arrester)
 - Ability to reduce noise of 10dB in the low frequency range (30-15Hz)

HVAC facilities applied with Arc7 Ice Class (-50°C) for Arctic environment
 - Computational Fluid Dynamics for Anti-icing Louver - Heating Coil

Arc7 Ice Class(-50°C) Electric Type Anti-icing Louver
 - Computational analysis of Anti-icing Louver applied to Heating Cable
